

*Building strong connections for
healthy communities.*

Are you working towards your LCSW, LPC, LMFT? Are you looking for free supervision?

We believe that healthy relationships are the vehicle through which our youth and families are able to grow and thrive. With skillful engagement, we strive to establish trusting relationships and meaningful connections so that individuals are empowered to find the voice to advocate for their needs and the confidence to pursue their aspirations. It is our hope that each person involved in our program learns to identify an authentic sense of self, develop and sustain healthy relationships, recognize and participate in safe communities and ultimately to live their lives with intention.

PWI received an OHA grant to provide group clinical supervision to individuals working towards their licensure. We will be providing free supervision to associates seeking licensure. The associates must have graduate degrees in MSW, Marriage Family and Children, and Counseling. Associates need to come from backgrounds; Black, Indigenous and People of Color, Immigrant/Refugees and LGBTQ+.

**Kristine "Doozie"
Midyett, LCSW**
